

Digital Risk Protection Service

PROTECT YOUR BRAND

OVERVIEW

NSFOCUS Digital Risk Protection Service (DRPS) is a SaaS-based solution designed to support your organization to mitigate digital risks through your digital transformation journey and daily operations. DRPS empowers businesses to enhance your visibility regarding counterfeit websites, phishing campaigns, VIP impersonations, and social media impersonations aimed at your customers, partners, and employees. It also provides awareness of data leaks occurring on the dark web, document sharing platforms, and code repositories.

When it comes to cyber threats, rapid response is critical. DRPS equips you with a user-friendly online self-service portal, empowering you to actively monitor and manage the detection of fraudulent activities and data breach risks on a daily basis. With DRPS, you can swiftly identify and take down fraudulent websites, mobile applications, and social network service (SNS) account impersonations. Additionally, it facilitates the prompt removal of leaked data from the internet, thereby minimizing potential damage to your business operations and brand reputation.

KEY BENEFITS

Visibility

Gain clear sight into potential fraud threats, phishing attacks and data leaks.

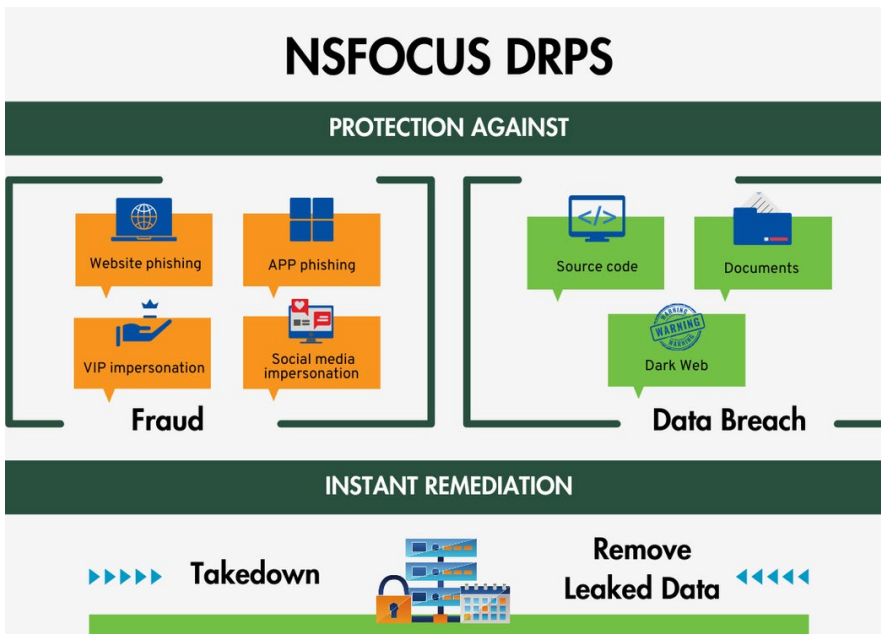

Control

Take immediate action against confirmed threats with a user-friendly self-service portal.

Protection

Protect your business and brand by taking down counterfeits and removing leaked data.

NSFOCUS DRPS has successfully taken down fraudulent websites, mobile apps, and SNS account impersonations in more than 50 countries and possesses unique capabilities for handling takedowns in China.

LIFECYCLE DIGITAL RISK PROTECTION

Enterprises heavily rely on social and digital channels to enhance daily productivity, customer engagement, and business growth. Due to this dependence, it is crucial for businesses to safeguard these channels against risks such as fraud, data breaches, code leaks, and false threat alerts. NSFOCUS DRPS offers full lifecycle digital risk protection, safeguarding your digital assets and data from external threats.

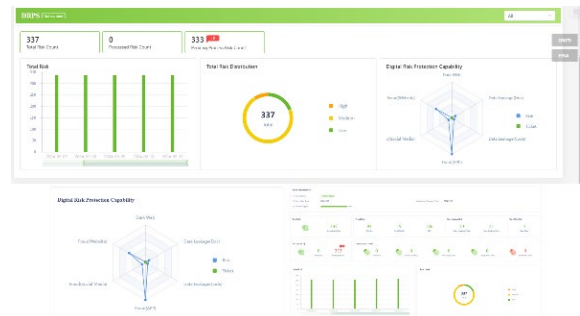

BROAD SPECTRUM DEFENSE

NSFOCUS DRPS offers extensive coverage, including various web services, nearly 200 app stores, code sites, major global social media platforms, knowledge sharing communities, and the deep and dark webs.

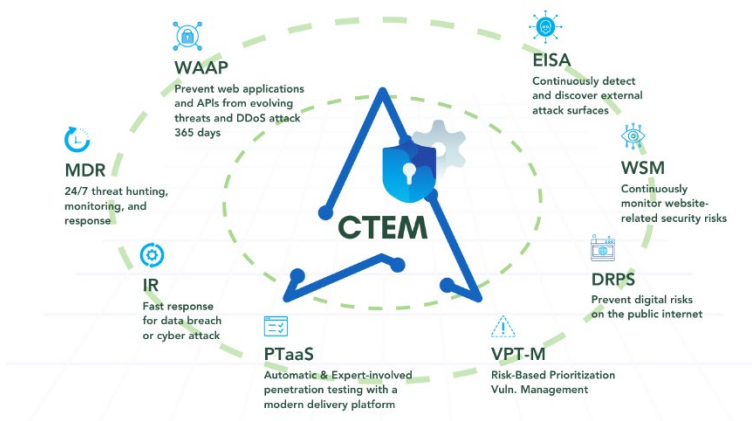

USER-FRIENDLY SELF-SERVICE PORTAL MADE YOUR SECURITY POSTURE INTUITIVE

This service comes with accounts for a self-service portal. This portal presents your organizations' security posture in real time and helps your security operations team discover and handle malicious activities and potential risks easily and promptly.

NSFOCUS SAAS OFFERINGS FOR ACTIVE DEFENSE
